

# Sustainability Policy

Sustainability is a significant priority for Faegre & Benson. We believe that environmental stewardship and effective client service are fundamentally connected.

Sustainability benefits our clients, our communities and our firm. We are evaluating and improving our practices for conservation. We will reduce our consumption, conserve energy, reduce waste, increase recycling and encourage sustainable practices for commuting and business travel.

Our commitment to sustainability encompasses our supply chain, internal operations, and service delivery. We will promote sustainability not only within our firm, but also to clients and in our communities.
