# Building Better Construction Contracts 2012

New York City, September 18, 2012

Live Webcast, September 18, 2012 – [www.pli.edu](http://www.pli.edu)

## What's on the Agenda?

This course is designed to give you the tools you need to better negotiate and draft design and construction agreements. You will learn which risk allocation clauses work and under what circumstances – including the so-called “killer clauses” – and which more often prove counterproductive. We will examine new collaborative contracting models such as Integrated Project Delivery (IPD), so as to enable you to choose what aspects of these agreements might assist your clients. We will also look at how to best leverage new technologies such as Building Information Modeling (BIM) to achieve better project outcomes. And you will learn what risks are best handled through insurance, and how to draft state-of-the-art insurance and indemnity provisions, including those for such integrated programs as Owner-Controlled Insurance Programs (OCIPs). Innovative dispute resolution approaches will also be examined. Sign up today and hear experts in the field give you the tools you need to stay on top of new and important developments in construction contracting.

## What You Will Learn

- Evaluate and draft meaningful and effective incentive provisions
- Better understand the role of insurance in construction contracting, and how to negotiate and draft appropriate insurance and indemnity clauses
- Develop collaborative contracting arrangements and learn how the new IPD agreements work
- Identify and draft appropriate dispute resolution models
- Leverage new technologies through creating BIM execution plans
- Earn one full hour of ethics credit

New York City, #35484; Program Fee: \$1,595

## FACULTY

### Co-Chairs:

**Patrick J. O'Connor, Jr.**  
Faegre & Benson LLP  
Minneapolis
